**Chipper the Clown** Harper Collins  
Before there is peace, blood will spill  
blood... New territory brings new  
troubles for the fierce cats of the warrior  
Clans, who are still uncovering the  
secrets of their new home around the  
lake. Dangers they have never faced  
before are lurking in the twilight  
shadows, and former allies are acting

strangely hostile. As divisions between  
the Clans grow deeper, Firestar's  
daughters face troubling decisions. One  
is torn between loyalty to her calling and  
a forbidden love, while the other  
struggles with her best friend's betrayal  
and the surprising perils of the forest.  
The choices they make now could affect  
ThunderClan for generations to come . . .  
and with an unexpected enemy  
preparing to attack, their courage and

strength will be needed more than ever if the Clan is to survive.

**J. S. Bach, Volume Two** Golden Books  
Chipper the Clown tells the story of a man who remembers his childhood dreams of only wanting to make people laugh. So he packs up his things and goes off to join the circus as a clown. Then he is embarrassed when he finds out he isn't good at it. Nobody thinks he's funny. Who ever heard of a clown in a pinstriped suit? So what will Chipper do? He turns to the older, more experienced clowns for some good advice. This story is about the benefits of asking the right people for help and not giving up when following a dream.

An Instant #1 New York Times

Bestseller! An Instant Indie Bestseller!  
\*An Amazon Best Book of the Year \* A B&N Best Book of the Year\* A great gift for tiny go-getters and big dreamers, including for back to school! NBA champion and superstar LeBron James pens a slam-dunk picture book inspired by his foundation's I PROMISE program that motivates children everywhere to always #StriveForGreatness. Just a kid from Akron, Ohio, who is dedicated to uplifting youth everywhere, LeBron James knows the key to a better future is to excel in school, do your best, and keep your family close. I Promise is a lively and inspiring picture book that reminds us that tomorrow's success starts with the promises we make to ourselves and our community today. Featuring James's upbeat, rhyming text

and vibrant illustrations perfectly crafted for a diverse audience by #1 New York Times bestselling and Geisel Honor winning artist Nina Mata, this book has the power to inspire all children and families to be their best. Perfect for shared reading in and out of the classroom, I Promise is also a great gift for graduation, birthdays, and other occasions. Plus check out the audiobook, read by LeBron James's mother and I Promise School supporter Gloria James! [The Road Car and WRC Story](#) Harper Collins

An all-new novelization based on Space Jam: A New Legacy, starring LeBron James and the Looney Tunes! Basketball superstar LeBron James teams up with Bugs Bunny and the Looney Tunes for Space Jam: A New Legacy, the long-

awaited reimagining of the original, beloved film. Boys and girls ages 8 to 12 will be thrilled to read this novelization that features eight pages of full-color images.

 Novelization (Space Jam: A New Legacy)  
 MP Publishing  
 The power of transformative design,  
 multidisciplinary leaps, and diversity:  
 lessons from a Black professional's  
 journey through corporate America.  
 Design offers so much more than an  
 aesthetically pleasing logo or banner, a  
 beautification add-on after the heavy  
 lifting. In Reimagining Design, Kevin  
 Bethune shows how design provides a  
 unique angle on problem-solving—how it

can be leveraged strategically to cultivate innovation and anchor multidisciplinary teamwork. As he does so, he describes his journey as a Black professional through corporate America, revealing the power of transformative design, multidisciplinary leaps, and diversity. Bethune, who began as an engineer at Westinghouse, moved on to Nike (where he designed Air Jordans), and now works as a sought-after consultant on design and innovation, shows how design can transform both individual lives and organizations. In Bethune's account, diversity, equity, and inclusion emerge as a recurring theme. He shows how, as we leverage design for innovation, we also need to consider the broader ecological implications of our decisions and acknowledge the threads

of systemic injustice in order to realize positive change. His book is for anyone who has felt like the "other"—and also for allies who want to encourage anti-racist, anti-sexist, and anti-ageist behaviors in the workplace. Design transformation takes leadership—leaders who do not act as gatekeepers but, with agility and nimbleness, build teams that mirror the marketplace. Design in harmony with other disciplines can be incredibly powerful; multidisciplinary team collaboration is the foundation of future innovation. With insight and compassion, Bethune provides a framework for bringing this about.

*Power* Convergent Books  
Author and illustrator Lee Crutchley brings his lively interactive approach to a little-discussed but very common

issue: the struggle with depression and anxiety. Through a series of supportive, surprising, and engaging prompts, HOW TO BE HAPPY (OR AT LEAST LESS SAD) helps readers see things in a new light, and rediscover simple pleasures and everyday joy...or at least feel a little less sad. By turns a workbook, trusted friend, creative outlet, security blanket, and secret diary, the pages of this book will offer solace, distraction, engagement, a fresh perspective, and hopeful new beginnings—for readers of all ages and walks of life.

An epistolary novel set on a fictional island off the South Carolina coastline, 'Ella Minnow Pea' brings readers to the

hometown of Nevin Nollop, inventor of the pangram 'The Quick Brown Fox Jumps Over the Lazy Dog'. Deified for his achievement in life, Nevin has been honored in death with a monument featuring his famous phrase. One day, however, the letter 'Z' falls from the monument, and some of the islanders interpret the missing tile as a message from beyond the grave. The letter 'Z' is banned from use. On an island where the residents pride them-selves on their love of language, this is seen as a tragedy. They are still reeling from the shock when another tile falls. And then another... In his charming debut, first published in 2001, Mark Dunn took readers on a journey through the eyes of Ella Minnow Pea, a young woman forced to create another clever turn of phrase

in order to save the islanders' beloved language.

**Ella Minnow Pea** MIT Press

The volume provides an exhaustive catalog of common standard day corrections for gas turbine gas path parameters, explores their history, and, most importantly, provides a mathematical framework for the derivation of these important normalization factors. Although use of these corrections is common practice within industry, government, and academia, their genesis, and, in particular, how they can be derived from simple principles, is not general knowledge among many of those who use them on a regular basis. This book elucidates calculation of these important coefficients. Standing as a one-stop

source on derivations and a methodology for additional parameter correction refinements, *Gas Turbine Parameter Corrections*, is ideal as a desk reference for practitioners and researchers, as well as supplemental instruction for university courses on gas turbine performance, control, and DPHM (diagnostics, prognostics and health management).

*Just Like Percy* Veloce Publishing Ltd

With more than 12 million books sold, the *My Weird School* series really gets kids reading! It's Christmas, and you know what that means! Santa Claus is coming to town! Or at least to the local mall. But what happens when kid rapper Cray-Z gives a Christmas concert at the same mall and all his fans go bananas? One thing's for sure—if A.J. and the gang

from Ella Mentry School want to save the day, they will need a Christmas miracle. Bestselling author Dan Gutman brings his kid-friendly sense of humor to this special series of after-school, holiday-themed chapter books featuring hilarious stories and thirty-two pages of games, puzzles, and more. This is one weird Christmas special you won't want to miss!

**Reimagining Design** Random House Books for Young Readers  
Volume 2 of 2-volume set. This stimulating narrative traces Bach's life; discusses contemporary artistic and philosophical movements; assesses the work of his predecessors Schutz, Scheidt, Buxtehude, etc., analyzes Bach's own work; and passes on brilliant recommendations for performance —

tempo, phrasing, accentuation, dynamics, etc. Translated by Ernest Newman.

U.S. general aviation Courier Corporation  
Covers the period from 1790 to 1905 in The Times of London.

**Commodity by country of destination** Springer Nature

The definitive international history of one of the world's most successful rally cars. Covers every Lancer model - including all special editions, and Dodge, Colt, Plymouth, Valiant, Eagle, Proton and Hyundai variants - from 1973 to date. Includes a Foreword by Shinichi Kurihara, Mitsubishi's Evo team leader.

This book is about machine translation (MT) and the classic problems associated with this language technology. It examines the causes of these problems and, for linguistic, rule-based systems, attributes the cause to language's ambiguity and complexity and their interplay in logic-driven processes. For non-linguistic, data-driven systems, the book attributes translation shortcomings to the very lack of linguistics. It then proposes a demonstrable way to relieve these drawbacks in the shape of a working translation model (Logos Model) that has taken its inspiration from key assumptions about psycholinguistic and neurolinguistic function. The book suggests that this brain-based mechanism is effective precisely

because it bridges both linguistically driven and data-driven methodologies. It shows how simulation of this cerebral mechanism has freed this one MT model from the all-important, classic problem of complexity when coping with the ambiguities of language. Logos Model accomplishes this by a data-driven process that does not sacrifice linguistic knowledge, but that, like the brain, integrates linguistics within a data-driven process. As a consequence, the

book suggests that the brain-like mechanism embedded in this model has the potential to contribute to further advances in machine translation in all its technological instantiations.
