Creativity in pre-school education contributes to the understanding of creativity in early childhood education and care. The volume is the result of a three-year-research process that has involved an experienced team of researchers and a large number of practitioners. The volume provides the reader with comprehensive array of perspectives on the topic, starting off from the specificities which characterize early childhood education and care in 10 different European countries. The book is organized in four sections: (1) the national literature reviews on creativity; (2) the transnational literature review and thematic analysis of creativity in pre-school education; (3) the perspective of the teachers on creativity; (4) creativity and pre-school education practices.

Mind in the Making World Bank Publications

Care and support affects a large number of people: eight out of 10 people aged 65 will need some care and support in their later years; some people have impairments from birth or develop them during their working life; some 5 million people care for a friend or relative, some for more than 50 hours a week. The current system does not offer enough support until a crisis point is reached, the quality of care is variable and inconsistent, and the growing and ageing population is only going to increase the pressure. Consequently, two core principles lie at the heart of this White Paper. The first is that individuals, communities and Government should do everything possible to prevent, postpone and minimise people's need for formal care and

support. The system should be built around the promotion of people's independence and well-being. The second principle is that people should be in control of their own care and support, with personal budgets and direct payments, backed by clear, comparable information and advice that will allow individuals and their carers to make the choices that are right for them. This paper sets out the principles and approach, with sections covering: strengthening support within communities; housing; better information and advice; assessment, eligibility and portability for people who use care services; carers' support; defining high-quality care; improving quality; keeping people safe; a better local care market; workforce; personalised care and support; integration and joined-up care.

Substantial increases in agricultural investments in developing countries are needed to combat poverty and realize food security and nutrition goals. There is evidence that agricultural investments can generate a wide range of developmental benefits, but these benefits cannot be expected to arise automatically and some forms of large-scale investment carry risks for host countries. Although there has been much debate about the potential benefits and risks of international investment, there is no systematic evidence on the actual impacts on the host country and their determinants. In order to acquire an in-depth understanding of potential benefits, constraints and costs of foreign investment in agriculture and of the business models that are more conducive to development, FAO has undertaken research in developing countries. This publication summarizes the results of this research, in particular through the presentation of the main findings of case studies in nine developing countries. It presents case studies on policies to attract foreign investment in agriculture and their impacts on national economic development in selected countries in Africa, Asian and Latin

America.

Every year, the cost of a four-year degree goes up, and the value goes down. But for many students, there's a better answer. So many things are getting faster and cheaper. Movies stream into your living room, without ticket or concession-stand costs. The world's libraries are at your fingertips instantly, and for free. So why is a college education the only thing that seems immune to change? Colleges and universities operate much as they did 40 years ago, with one major exception: tuition expenses have risen dramatically. What's more, earning a degree takes longer than ever before, with the average time to graduate now over five years. As a result, graduates often struggle with enormous debt burdens. Even worse, they often find that degrees did not prepare them to obtain and succeed at good jobs in growing sectors of the economy. While many learners today would thrive with an efficient and affordable postsecondary education, the slow and pricey road to a bachelor's degree is starkly the opposite. In *A New U: Faster + Cheaper Alternatives to College*, Ryan Craig documents the early days of a revolution that will transform—or make obsolete—many colleges and universities. Alternative routes to great first jobs that do not involve a bachelor's degree are sprouting up all over the place. Bootcamps, income-share programs, apprenticeships, and staffing models are attractive alternatives to great jobs in numerous growing sectors of the economy: coding, healthcare, sales, digital marketing, finance and accounting, insurance, and data analytics. *A New U* is the first roadmap to these groundbreaking programs, which will lead to more student choice, better matches with employers, higher return on investment of cost and time, and stronger economic growth.

How did the books of the Bible come to be recognized as Holy Scripture? After nearly nineteen centuries the canon of Scripture still remains an issue of debate. Adept in both Old and New Testament studies, F. F. Bruce brings the wisdom of a lifetime of reflection and biblical interpretation to bear in addressing the criteria of canonicity, the canon within the canon, and canonical criticism.

Introduces the different combinations of people that may make up a human family, and compares them to family types in the animal kingdom

My Family, Your Family! Bloomsbury Publishing

With a nod to Richard Scarry, this inventive picture book surprises readers with every turn of the page! Hiss! Screech! Roar! It's a noisy day in Bumperville! But are the sounds what you think they are? That Honk! must surely be a goose. But turn the page and it's the taxi that a goose is driving! Using cleverly placed die-cuts, this inventive book hints at what is making the sound, but with each turn of the page, it's an eye-opening surprise and part of an unfolding story that is part guessing game and part giggle-inducing caper. Abi Cushman is the master of surprise and silliness in this absolutely delightful picture book.

Army ROTC Scholarship Program HarperCollins Leadership

This sweet true story stars a tiny, orphaned elephant who was given another chance. When Chhouk, an Asian elephant calf, was found, he was alone, underweight, and had a severe foot injury. Conservationist Nick Marx of Wildlife Alliance rescued the baby elephant. With help from the Cambodian Forestry Administration, the Cambodian School of Prosthetics and Orthotics, and an elephant named Lucky, Nick nursed Chhouk back to health and made him an artificial foot. One of the first animals to ever be fitted with a prosthetic, Chhouk helped pioneer the technology -- and most importantly, was able to walk again! This true animal rescue story will satisfy animal lovers and capture the hearts of both young readers and their parents.

Everyday Mathematics Createspace Independent Publishing Platform

This booklet provides information about the values and skills that make up character and good citizenship and what you can do to help your child develop strong character. It suggests activities that you and your school-aged children can do to put those values to work in your daily lives and tips for working with teachers and schools to ensure that you act together to promote the basic values that you want your child to learn and use. Finally, this booklet provides an extensive list of books and other resources with character-related themes that you can read and discuss with your child to encourage character and citizen development.

Changing Higher Education for a Changing World draws on the outcomes of the cutting-edge research programmes of the UK-based Centre for Global Higher Education, the world's largest social science research centre focused on higher education and its future. In countries with incomes at European levels, the majority of all families now have connections to higher education, and there is widespread popular interest in how it can be made better. Together, the contributors sharply illuminate key issues of public and policy interest across the world: Do research universities make society more equal or more unequal? Are students graduating with too much debt? Who do we want to be attending universities? Will learning technologies will abolish the need for bricks-and-mortar higher education institutions? What can countries do to improve their scientific performance? How can comparative teaching assessment and research assessment become much more effective? The book explores higher education in the major higher

education regions including China, Europe, the UK and the USA.

Wondering why your sales prospects keep ghosting you? Want your sales outreach and your revenue goals to come alive? Want to sanity-check your email habits to see if you're at risk of becoming a sales zombie? The Email Cemetery lets you dig deep into real sales emails that died on the way to their prospect's inbox. Professional sales trainer, Charlene DeCesare, uses helpful humor to guide you through the headstones within The Email Cemetery. You will sift through complete email post-mortems, discover how to self-diagnose your email persona, and learn what it will take to get your emails - and your sales goals - off life support. Through a balance of wit and expertise, this professional sales email coroner identifies: -The most common email mistakes, categorized by eight humorous personas -Exactly where these email cemetery residents went wrong -A quick checklist of symptoms to see if you might be at risk -Actionable advice for email resuscitation so your sales numbers don't flatline Give your sales emails some much needed C.P.R. and avoid the email apocalypse!

Higher Education Opportunity Act Penguin

Providing comprehensive discussions of the physical and chemical properties, manufacture, and industrial uses of biosurfactants, this reference offers first-hand accounts of biosurfactant research of leading biotechnology laboratories. It introduces promising possible uses of biosurfactants in medicine, in environmental control, and for marine organisms. In contributions of more than 30 leading international experts, the text reviews the biosynthetic mechanisms for surfactants and their precursor molecules; explicates the biophysics of microbial surfactants and examines the production of immobilized biocatalysts, lipopeptides, and rhamnolipids. It also presents information on the economics of biosurfactants.

[So You Want to Be an Owl](#) Greystone Books Ltd

A determined snail. A plump cabbage. A truly epic journey . . . In a book as cheerful and charming as Snail himself, Corey Tabor tells a winning tale of a slow but steady snail, whose determination and kindness bring him the best reward of all: friendship.

Hymnal Sern

This book lays out a rationale, provides supporting evidence, and suggests promising pathways for Sub-Saharan Africa to sustain current economic growth by aligning its tertiary education systems with national economic strategies and labor market needs.

The Role of Educators in Preventing and Responding to Child Abuse and Neglect Dorling Kindersley Ltd

'The Education System in Malawi', an Education Country Status Report (CSR), is a detailed analysis of the current status of the education sector in Malawi, the results of which have been validated by the government of Malawi. Its main purpose is to enable decision makers to orient national policy on the basis of a factual diagnosis of the overall education sector and to provide relevant analytical information for the dialogue between the government and development partners. The analysis incorporates data and information from multiple sources, such as school administrative surveys by the Ministry of Education, household surveys, and a tracer survey created especially for this study. This CSR, developed by a multi-ministerial national team supported by UNESCO P le de Dakar, the World Bank, and GTZ specialists, updates the previous one drawn up in 2003 and consists of eight chapters, including a chapter on higher education. The analysis provides key monitoring and evaluation inputs for the overall education sector, particularly under the framework of the implementation of the National Education Sector Plan.

Bullying Prevention and Response BenBella Books

Over the last half century, college textbooks on management have taught the importance of valuing the human assets of a business, and they have also focused on how to effectively and appropriately manage those assets. And yet, we look around and rarely see it practiced. In *Activate Human Capital*, author Richard N. Morrison outlines the eight People-Focused Principles of Management, and he explains them in terms of the values that motivate people to want to do the work given to them. And even more, he shows how these values will actually get employees to initiate their work because they will see how it contributes to the overall purpose of the business. Each principle—such as giving people a purpose, communicating widely, accommodating change, creating a culture of worth and hope, and rewarding performance, to name a few—is linked to a component of human fulfillment, and then through research, personal experience, and shared stories, Morrison discusses how to activate each principle and demonstrates what it should look like in the workplace. Eight simple principles can help enhance all business relationships and improve efficiency, productivity, and profitability—if only managers are willing to change. People-focused management has been done, is being done, and will be done increasingly more often as more business leaders comprehend the potential in this empowering form of leadership. When employees feel valued, respected, encouraged, and fulfilled, they will work harder and be more invested in their work—and in the success of the business.

CRC Press

"In *Staying Online*, one of our most respected online learning leaders offers uncommon insights into how to reimagine digital higher education. As colleges and universities increasingly recognize that online learning is central to the future of post-secondary education, faculty and senior leaders must now grapple with how to assimilate, manage, and grow effective programs. Looking deeply into the dynamics of online learning today, Robert Ubell maps its potential to boost marginalized students, stabilize shifts in retention and tuition, and balance nonprofit and commercial services. This impressive collection spans the author's day-to-day experiences as a digital learning pioneer, presents pragmatic yet forward-thinking solutions on scaling-up and digital economics, and prepares managers, administrators, provosts, and other leaders to educate our unsettled college students as online platforms fully integrate into the mainstream"--
