#### **Violence in Families** Routledge

Foundational topics such as history, ethics, and principles of primary prevention, as well as specific issues such as consultation, political issues, and financing. The second section addresses such topics as abuse, depression, eating disorders, HIV/AIDS, injuries, and religion and spirituality often dividing such topics into separate entries addressing childhood, adolescence, and adulthood.

#### **Preventing Substance Abuse Among Children and Adolescents** National Academies Press

Comprehensive history of the Children's Bureau from 1912-2012 in eBook form that shares the legacy of this landmark agency that established the first Federal Government programs, research and social reform initiatives aimed to improve the safety, permanency and well-being of children, youth and families. In addition to bios of agency heads and review of legislation and publications, this important book provides a critical look at the evolution of the Nation and its treatment of children as it covers often inspiring and sometimes heart-wrenching topics such as: child labor; the Orphan Trains, adoption and foster care; infant and maternal mortality and childhood diseases; parenting, infant and child care education; the role of women's clubs and reformers; child welfare standards; Aid to Dependent Children; Depression relief; children of migrants and minorities (African Americans, Hispanics, Native Americans), including Indian Boarding Schools and Indian Adoption Program; disabled children care; children in wartime including support of military families and World War II refugee children; Juvenile delinquency; early childhood education Head Start; family planning;

child abuse and neglect; natural disaster recovery; and much more. Child welfare and related professionals, legislators, educators, researchers and advocates, university school of social work faculty and staff, libraries, and others interested in social work related to children, youth and families, particularly topics such as preventing child abuse and neglect, foster care, and adoption will be interested in this comprehensive history of the Children's Bureau that has been funded by the U.S. Federal Government since 1912.

#### **The Dictionary of Family Psychology and Family Therapy** Springer Science & Business Media

This is the first prevention program model using telephone screening with a success rate. It's time saving and cost effective approach will have appeal to the private practitioner. There is an excellent Quick Assessment Form for ease of use. The Communication Development Birth to Five and the Sound Development Forms are extremely popular.

#### **Re-Visioning Public Health Approaches for Protecting Children** Springer Science & Business Media

Is it possible to overcome the enduring problem of child maltreatment? In Eradicating Child Maltreatment, leading international figures in the field of child welfare address this enduring and thorny question, setting out a public health approach to prevention. It draws on groundbreaking research and practice on prevention and early intervention from around the globe spanning health, social care, education and criminal justice. Contributors describe what is known about the incidence of child maltreatment, how far we have succeeded in eradicating it, which preventative strategies have been proven to be effective, and offers evidenced recommendations for policy and practice. Aiming to draw us nearer to the goal of a world free from child maltreatment first articulated by the visionary paediatrician Dr. C. Henry Kempe in 1978, this important book provides new insights for

professionals, managers, academics and policymakers across the range of child and family welfare services.

**Preventive Approaches in Couples Therapy** Psychology Press

Examines issues of Hispanic/Latino family, culture, and society as they relate to the design and evaluation of alcohol, tobacco and other drug problem prevention programs. Reviews concepts of substance abuse prevention and provides a conceptual framework for the understanding of adolescent problem behavior as it relates to family interactional factors. Additional chapters examine several model prevention programs serving the Hispanic/Latino community, including Project Mama, Shenandoah, and MET. Discusses future directions for substance abuse prevention programs in these communities.

**Sourcebook of Family Theories and Methods** Routledge

Irrespective of theoretical orientation, families matter. Families are the entity in which children are introduced to words, objects, shapes, and colors. Families are the people related in a myriad of conventional and unconventional ways that clothe, bathe, and feed its biological and acquired offspring. Influenced by race, ethnicity, income, and education, families relate not only to each other within the unit but to others in the neighborhood, the community, and beyond. This book is about families and their children. This book is about those times when the family unit experiences distress. This distress may be found in the serious illness of a child or a parent. It may be the result of a reconfiguration of the family as in divorce and remarriage. Or it may involve the harming of a family member sexually or physically. In this volume, the authors explore what family means today, what functions it serves, and those circumstances that can make family life painful. Importantly, the authors provide readers with clearly written information drawn from the most recent scientific investigations suggesting how the topics in this volume might be addressed to either ease that discomfort (treatment) or prevent its occurrence.

**Handbook of Prevention** John Wiley & Sons

From the Preface: This manual, *Child Protective Services: A Guide for Caseworkers*, examines the roles and responsibilities of child protective services (CPS) workers, who are at the forefront of every community's child protection efforts. The manual describes the basic stages of the CPS process and the steps necessary to accomplish each stage: intake, initial assessment or investigation, family assessment, case planning, service provision, evaluation of family progress, and case closure. Best practices and critical issues in casework practice are underscored throughout. The primary audience for this manual includes CPS caseworkers, supervisors, and administrators. State and local CPS agency trainers may use the manual for preservice or inservice training of CPS caseworkers, while schools of social work may add it to class reading lists to orient students to the field of child protection. In addition, other professionals and concerned community members may consult the manual for a greater understanding of the child protection process. This manual builds on the information presented in *A Coordinated Response to Child Abuse and Neglect: The Foundation for Practice*. Readers are encouraged to begin with that manual as it addresses important information on which CPS practice is based-including definitions of child maltreatment, risk factors, consequences, and the Federal and State basis for intervention. Some manuals in the series also may be of interest in understanding the roles of other professional groups in responding to child abuse and neglect, including: Substance abuse treatment providers; Domestic violence victim advocates; Educators; Law enforcement personnel. Other manuals address special issues, such as building partnerships and working with the courts on CPS cases.

**Preventing Child Abuse and Neglect** SAGE Publications

In the past 10 years, there has been a substantial increase in the number of theoretical and empirical investigations into the maintenance and enhancement of close, romantic relationships. This literature targets the everyday behaviors, expressions of love, and cognitive styles that characterize such relationships. Chapters provide a sampling of the expanse of topics in the domain of how clinical scholars and practitioners address the timely topic of maintaining and enhancing close romantic relationships, including marriage. A distinguished group of scholars and therapists discuss specific problems, such as alcoholism and therapeutic interventions, such as insight therapy. Topics include maintenance issues relevant to: depression, anxiety disorders, the role of children in affecting close relationships, how premarital therapy may serve as an antidote to early relationship problems, forgiveness, remarriage issues, and peer marriage. This volume is intended for practitioners in the field of close romantic relationships, such as marriage, family and relationship therapists, and clinicians.

**Family Influences on Childhood Behavior and Development** American Psychiatric Pub

Family Support introduces and explores the state of the art in preventative social work with children and young people. Drawing on contemporary thinking and research, the book aims to make a contribution to current debates about how we can best support families in need. Underpinning the book is an analysis of how family support is changing, having moved from 'prevention' through to contemporary debates about 'family support', 'early intervention' and 'early help'. The authors draw on their own practice experiences to ensure the discussion remains highly relevant to everyday realities. The book consists of three parts: Part I examines the history and context of family support; Part II outlines a number of practice approaches to family support; and Part III suggests how family support work can be further developed. The book provides 'think points' and case studies to support the reader in reflecting on the material presented and how this can be best applied, as well as including a guide to useful resources. Family Support will be a welcome companion for anyone involved in child welfare and safeguarding services, including students at undergraduate and post-graduate level, practitioners, policy makers and academics.

**Family Support: Prevention, Early Intervention and Early Help** Springer Science & Business Media

Irrespective of theoretical orientation, families matter. Families are the entity in which children are introduced to words, objects, shapes, and colors. Families are the people related in a myriad of conventional and unconventional ways that clothe, bathe, and feed its biological and acquired offspring. Influenced by race, ethnicity, income, and education, families relate not only to each other within the unit but to others in the neighborhood, the community, and beyond. This book is about families and their children. This book is about those times when the family unit experiences distress. This distress may be found in the serious illness of a child or a parent. It may be the result of a reconfiguration of the family as in divorce and remarriage. Or it may involve the harming of a family member sexually or physically. In this volume, the authors explore what family means today, what functions it serves, and those circumstances that can make family life painful. Importantly, the authors provide readers with clearly written information drawn

from the most recent scientific investigations suggesting how the topics in this volume might be addressed to either ease that discomfort (treatment) or prevent its occurrence.

**Social Policy for Children and Families** Springer Science & Business Media

Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

**Prevention in Family Services** SAGE Publications

This thorough exploration of the major types of family violence details the range of abusive behaviors perpetrated within family systems. Case vignettes effectively illustrate these events, and the victims' experiences and perceptions of the abuse. Chapters delineate: the reasons why various types of abuse continue to occur; how different types of violent behavior may be treated; and suggestions for prevention. In addition, the author provides definitions of terms, summaries, valuable references and additional suggested readings.

**Depression in Parents, Parenting, and Children** DIANE Publishing

Many policy and practice initiatives that aim to prevent social exclusion focus on children and young people. This book seeks to consider new approaches to understanding the complexities of prevention, and how these new understandings can inform policy and practice. The authors use evidence from the National Evaluation of the Children's Fund to illustrate and explore the experiences of children and families who are most marginalised. They consider the historical context of approaches to child welfare, and present a new framework for understanding and developing preventative policies and practice within the context of social exclusion. Preventative initiatives such as the Children's Fund have supported large-scale complex evaluations that have generated rich and important data about strategies for addressing social exclusion and what they can achieve. The findings of this book have direct relevance for all those engaged in developing preventative policy and practice and will therefore be of interest to policy makers, practitioners and students of child welfare and social policy more broadly, in providing a timely discussion of key debates in designing, delivering and commissioning preventative services.

**Understanding Family Violence** Greenwood Publishing Group

Most health professionals would agree that time and funds are in short supply, even under optimal conditions. Patients, too, would admit similar shortfalls, even with optimal motivation. This book offers self-administered and easily administered interventions designed to promote positive health behaviors while requiring little or no outside funding. Editor Luciano L'Abate continues his long tradition of prolific innovations by identifying major changes in today's health care systems and explaining how targeted, prescriptive promotion/prevention strategies can enhance traditional primary, secondary, and tertiary interventions in key behavioral and relational areas.

**Violence in Families** Routledge

In addition to introducing readers to the field of family-based prevention science, Family-Based Prevention Programs for Children and Adolescents highlights the distinctive contributions of a set of exemplary programs in terms of their foundational theory, design, delivery mechanisms, performance, and unique opportunities for future research. It is organized into three sections to orient readers to: the existence of different types of family-based programs targeting families with children of different ages; the strategies and challenges that arise when attempting large-scale dissemination of prevention programs; and, the emerging innovations that promise to push the field forward into uncharted territories. Each chapter is written by a preeminent program developer, including: Gene H. Brody Richard F. Catalano Patricia Chamberlain Thomas J. Dishion Marion S. Forgatch Kevin P. Haggerty Cleve Redmond Matthew R. Sanders Richard L. Spoth Carolyn Webster-Stratton Contributors review the state of the research and then provide a summary of their own program, including research and dissemination efforts. They also discuss take-home lessons for practitioners and policymakers, and provide their view of the future of program development and research in their area. As an important signpost signifying the noteworthy achievements of the field to date, as well as an arrow pointing the field toward significant growth in the future, this book is a must-have primary resource for graduate students in developmental or clinical psychology, counseling, family sciences, social work, or health policy, and an essential guide for practitioners and policymakers in the field of family-based prevention, family service delivery, or public health. National Academies Press

Depression is a widespread condition affecting approximately 7.5 million parents in the U.S. each year and may be putting at least 15 million children at risk for adverse health outcomes. Based on evidentiary studies, major depression in either parent can interfere with parenting quality and increase the risk of children developing mental, behavioral and social problems. *Depression in Parents, Parenting, and Children* highlights disparities in the prevalence, identification, treatment, and prevention of parental depression among different sociodemographic populations. It also outlines strategies

for effective intervention and identifies the need for a more interdisciplinary approach that takes biological, psychological, behavioral, interpersonal, and social contexts into consideration. A major challenge to the effective management of parental depression is developing a treatment and prevention strategy that can be introduced within a two-generation framework, conducive for parents and their children. Thus far, both the federal and state response to the problem has been fragmented, poorly funded, and lacking proper oversight. This study examines options for widespread implementation of best practices as well as strategies that can be effective in diverse service settings for diverse populations of children and their families. The delivery of adequate screening and successful detection and treatment of a depressive illness and prevention of its effects on parenting and the health of children is a formidable challenge to modern health care systems. This study offers seven solid recommendations designed to increase awareness about and remove barriers to care for both the depressed adult and prevention of effects in the child. The report will be of particular interest to federal health officers, mental and behavioral health providers in diverse parts of health care delivery systems, health policy staff, state legislators, and the general public.

**Family Life Education** Butterworth-Heinemann Medical

*Preventive Approaches in Couples Therapy* is the first thorough overview of the leading approaches to preventing marital distress and dissolution. Written for professionals, paraprofessionals, and lay people involved in the development and implementation of preventive programs, the editors have created a resource accessible to all those in the field of couples therapy. The volume serves as an important resource for programs that the therapist may already use and as an insightful introduction into new programs that can strengthen and invigorate these existing therapeutic approaches.

*Child Protective Services* National Academies Press

The vast literature on family problems suggests that most researchers and professionals see these problems as inevitable, and their own role as one of curing rather than preventing them. The family wellness movement attempts to step back a stage, with the emphasis on prevention rather than cure. Citing parallels with the movement towards prevention in medicine, Mace draws upon the insights of noted workers in the field who discuss their own roles in developing family enrichment programmes. Their readable accounts of the philosophical and practical benefits of family wellness will make this book crucial reading for family researchers, social service professionals, educators, clergy, and students.

*Children, families and social exclusion* Policy Press

Reports of mistreated children, domestic violence, and abuse of elderly persons continue to strain the capacity of police, courts, social services

agencies, and medical centers. At the same time, myriad treatment and prevention programs are providing services to victims and offenders. Although limited research knowledge exists regarding the effectiveness of these programs, such information is often scattered, inaccessible, and difficult to obtain. *Violence in Families* takes the first hard look at the successes and failures of family violence interventions. It offers recommendations to guide services, programs, policy, and research on victim support and assistance, treatments and penalties for offenders, and law enforcement. Included is an analysis of more than 100 evaluation studies on the outcomes of different kinds of programs and services. *Violence in Families* provides the most comprehensive review on the topic to date. It explores the scope and complexity of family violence, including identification of the multiple types of victims and offenders, who require different approaches to intervention. The book outlines new strategies that offer promising approaches for service providers and researchers and for improving the evaluation of prevention and treatment services. *Violence in Families* discusses issues that underlie all types of family violence, such as the tension between family support and the protection of children, risk factors that contribute to violent behavior in families, and the balance between family privacy and community interventions. The core of the book is a research-based review of interventions used in three institutional sectors--social services, health, and law enforcement settings--and how to measure their effectiveness in combating maltreatment of children, domestic violence, and abuse of the elderly. Among the questions explored by the committee: Does the child protective services system work? Does the threat of arrest deter batterers? The volume discusses the strength of the evidence and highlights emerging links among interventions in different institutional settings. Thorough, readable, and well organized, *Violence in Families* synthesizes what is known and outlines what needs to be discovered. This volume will be of great interest to policymakers, social services providers, health care professionals, police and court officials, victim advocates, researchers, and concerned individuals.

*Primary Prevention in Mental Health* SAGE Publications, Incorporated

*Origins* We call this book on theoretical orientations and methodological strategies in family studies a sourcebook because it details the social and personal roots (i.e., sources) from which these orientations and strategies flow. Thus, an appropriate way to preface this book is to talk first of its roots, its beginnings. In the mid 1980s there emerged in some quarters the sense that it was time for family studies to take stock of itself. A goal was thus set to write a book that, like Janus, would face both backward and forward a book that would give readers both a perspective on the past and a map for the future. There were precedents for such a project: *The Handbook of Marriage and the Family* edited by Harold Christensen and published in 1964; the two *Contemporary Theories about the Family* volumes edited by Wesley Burr, Reuben Hill, F. Ivan Nye, and Ira Reiss, published in 1979; and the *Handbook of Marriage and the Family* edited by Marvin Sussman and Suzanne Steinmetz, then in production.
