Family, Work and Pay

Russell Sage  
Foundation  
Attempts to do justice  
to the complexity of

contemporary families and to situate them in their economic, political, and cultural contexts. This book explores the ways in which family life is gendered and reflects on the work of maintaining family and kin relationships, especially as social and family power structures change over time.

*Working Families and the Revolution at Home* Routledge  
Countries covered in the empirical case studies are Russia, Estonia, Poland, the Czech and Slovak republics, the former East Germany, Hungary, and Bulgaria.  
*Career and Family* Houghton Mifflin  
Auteur onderzoekt de wisselwerking tussen genderideologie en de arbeidsverdeling naar

seks van de 16e tot de 20e eeuw.

The Triple Overlap  
Princeton University Press

In *Women Want More*, Michael Silverstein and Kate Sayre, two of the world's leading authorities on the retail business, argue that women are the key to fixing the economy. Based on a groundbreaking study and offering tremendous insight into the purchasing habits and power of women, *Women Want More* doesn't just offer a glimpse into consumer behavior; it reveals what consumer behavior says about human psychology and desire.

*Women's Century-Long Journey Toward Equity*  
Penguin Group  
Australia  
First published in 1987.

Routledge is an imprint of Taylor & Francis, an informa company.

**A Reader**

Harpercollins College Division  
The bestselling coming-of-age classic, acclaimed by critics, beloved by readers of all ages, taught in schools and universities alike, and translated around the world—from the winner of the 2019 PEN/Nabokov Award for Achievement in International Literature. *The House on Mango Street* is the remarkable story of Esperanza Cordero, a young Latina girl growing up in Chicago, inventing for herself who and what she will become. Told in a series of vignettes—sometimes heartbreaking, sometimes deeply

joyous—Sandra Cisneros' masterpiece is a classic story of childhood and self-discovery. Few other books in our time have touched so many readers.

*Why Gender Matters in Economics* Harvard

University Press  
The 1619 Project's lyrical picture book in verse chronicles the consequences of slavery and the history of Black resistance in the United States, thoughtfully rendered by Pulitzer Prize-winning journalist Nikole Hannah-Jones and Newbery honor-winning author Renée Watson. A young student receives a family tree assignment in school, but she can only trace back three generations. Grandma gathers the whole family, and the student

learns that 400 years ago, in 1619, their ancestors were stolen and brought to America by white slave traders. But before that, they had a home, a land, a language. She learns how the people said to be born on the water survived. And the people planted dreams and hope, willed themselves to keep living, living. And the people learned new words for love for friend for family for joy for grow for home. With powerful verse and striking illustrations by Nikkolas Smith, *Born on the Water* provides a pathway for readers of all ages to reflect on the origins of American identity.

*Gender and Work in Postwar Japan*  
Princeton University Press

This book explores the changing role of Muslim women in the economy in the twenty-first century. Sociological developments such as secular education, female-focused policies, national and global commitments to gender equality as well as contemporary technological advances have all served to shift and redefine the domestic and public roles of Muslim women, leading in many places to increases in workplace participation and entrepreneurship. The volume investigates the contexts of these shifts and the experiences of women balancing faith and other commitments to actively engage in the economy in vastly different countries. The

book looks at how family codes and the understandings of Muslim male and female roles sit alongside social and economic advances and the increases in women partaking in the economy. Within a globalised world, it also highlights the importance of the implementation of the current sustainable development priorities in the context of Muslim societies, including Sustainable Development Goal 5 that focuses on the vital role of women and their full participation in all areas of sustainable development. With cases ranging from Saudi Arabia, Iran, Bangladesh, Pakistan, Indonesia, Nigeria, Kenya through to Spain, Bulgaria and

Australia, Muslim Women in the Economy will be of considerable interest to those studying, researching and interested in gender, development and religious studies. *Women and the Economic Miracle* Macmillan International Higher Education Women, you need to stop and take a good look at what is real to see your position in a relationship. Where is it going? Has marriage been discussed after one year of courting? Does integrity guide this man? Can his word be depended upon? In **WOMEN DON'T TAKE THE BLAME**, Dr. Margarita D'Andrade helps to answer these questions and more. **Women and the Sexual Division of Labour in the**

**Philippines** Temple University Press Annotation Makes recommendations for removing the barriers women face in contributing to and benefiting from sustainable economic development. International experience has proved that support for a stronger role for women in society contributes to economic growth through improved child survival rates, better family health, and reduced fertility rates. Nevertheless, women still face many barriers in contributing to and benefiting from development. These include low investment in female education and health and restricted access to services and assets. This study highlights

five areas that could help change this inequitable situation: education, health, wage labor, agriculture and natural resource management, and financial services. A gender and development strategy is suggested that would take into account the relative roles and responsibilities of women and men, implying that the actions and attitudes of men must change. The ideas presented in this paper are an example of the World Bank's commitment to mainstreaming gender concerns into its operations. Although significant steps have already been taken in this direction, there remains a long road ahead. Also available: French (ISBN

0-8213-3023-3) Stock No. 13023; Spanish (ISBN 0-8213-3024-1) Stock No. 13024.

**A Political-Economic Analysis** Routledge

The excellent list of themes and chapters in this volume reflects the maturity reached by feminist economics in its different dimensions. Based on the notion of social provisioning for all as the basic objective of economics, they represent a challenge to conventional economic thought and they show the importance of understanding theory, institutions, empirical work, and policy from a gender perspective. The global perspective provided through themes and authors is a very useful contribution to the literature. Lourdes

Bener'a, Cornell University, US

Standard economics has a narrow and distorted vision of what the economy is, and how it works. Gender scholars are on the forefront of developing better, more encompassing models of human provisioning for well-being. This volume presents a wonderful sampling of these new theoretical and empirical developments. Paula England, New York University, US

This is an impressive collection that delves deeply and broadly into the myriad ways that gender shapes and alters economic lives and illuminates complex facets of the economic and social provisioning process across the globe. The chapters, by an

exciting variety of researchers, policy analysts, and practitioners from numerous fields, present a consistent and persuasive vision of economic well-being as critical to the flourishing of all people. Myra H. Strober, Stanford University, US In the aftermath of global economic downturn, it has never been more important to understand how gender relates to economic life and well-being. This interdisciplinary collection of original research details key areas of intersection, provides a comprehensive overview of the current state of research and proposes avenues for further investigation. The Handbook

illuminates complex facets of the economic and social provisioning process across the globe. The contributors academics, policy analysts and practitioners from wide-ranging areas of expertise discuss the methodological approaches to, and analytical tools for, conducting research on the gender dimension of economic life. They also provide analyses of major issues facing both developed and developing countries. Topics explored include civil society, discrimination, informal work, working time, central bank policy, health, education, food security, poverty, migration, environmental activism and the financial crisis. Economists, sociologists and

political scientists will find this book to be an invaluable research tool, as will academics, researchers and students with an interest in economics particularly feminist economics gender studies and global studies.

*Women's Work and the Family Economy in Historical Perspective*  
Routledge

An updated edition of a standard in its field that remains relevant more than thirty years after its original publication. Over thirty years ago, sociologist and University of California, Berkeley professor Arlie Hochschild set off a tidal wave of conversation and controversy with her bestselling book, *The Second Shift*. Hochschild's

examination of life in dual-career households finds that, factoring in paid work, child care, and housework, working mothers put in one month of labor more than their spouses do every year. Updated for a workforce that is now half female, this edition cites a range of updated studies and statistics, with an afterword from Hochschild that addresses how far working mothers have come since the book's first publication, and how much farther we all still must go.

The proposed SDN discusses the specific macro-critical aspects of women's participation in the

labor market and the constraints that prevent women from developing their full economic potential. Building on earlier Fund analysis, work undertaken by other organizations and academic research, the SDN presents possible policies to overcome these obstacles in different types of countries.

My Mom, Marijuana, and the Stoning of San Francisco Penguin Feminism and 'The Schooling Scandal' brings together feminist contributions from two generations of educational researchers, evaluating and celebrating the field of gender and education. The focus throughout is on the years of compulsory schooling, examining key concepts in gender

and education identified and developed by international thinkers in educational feminism. Topics covered include: social class, ethnicity and sexuality in relation to experiences in school; theories and methodologies for understanding gender; pedagogy and practice in education; and the direction of educational policy and the 'problem of boys'. Providing a comprehensive overview of contemporary research and theory emerging from 'second wave' feminism and assessing their impact on pupils and teachers in today's schools and classrooms, this book forms essential reading for anyone studying gender and education.

**Understanding Early  
 Civilizations** Springer  
 Following a look at

conventional ideologies of population control, the author develops an alternative analysis of overpopulation, exploring the roots of the environmental crisis, violence and inequality en route. Critiquing capitalism, industrialism, patriarchy and white supremacy, she shows how population control acts as another dimension of our essentially hierarchical world order--one that is moving us inexorably towards violence and destruction. Finally, she explores new global visions and efforts towards peace, justice and ecology. Paper edition (unseen), \$25.00. Annotation copyrighted by Book News, Inc., Portland, OR

**To All Wildflowers**  
Bloomsbury Publishing

An economic way of thinking about the gender issues confronting women around the world Gender matters in economics—for even with today's technology, fertility choices, market opportunities, and improved social norms, economic outcomes for women remain markedly worse than for men. Drawing on insights from feminism, postmodernism, psychology, evolutionary biology, Marxism, and politics, this textbook provides a rigorous economic look at issues confronting women throughout the world—including nonmarket scenarios, such as marriage, family, fertility choice, and bargaining within households, as well as

market areas, like those pertaining to labor and credit markets and globalization. Mukesh Eswaran examines how women's behavioral responses in economic situations and their bargaining power within the household differ from those of men. Eswaran then delves into the far-reaching consequences of these differences in both market and nonmarket domains. The author considers how women may be discriminated against in labor and credit markets, how their family and market circumstances interact, and how globalization has influenced their lives. Eswaran also investigates how women have been empowered through access to education,

credit, healthcare, and birth control; changes in ownership laws; the acquisition of suffrage; and political representation. Throughout, Eswaran applies sound economic analysis and new modeling approaches, and each chapter concludes with exercises and discussion questions. This textbook gives readers the necessary tools for thinking about gender from an economic perspective. Addresses economic issues for women throughout the world, in both developed and developing countries Looks at both market and nonmarket domains Requires only a background in basic economic principles Includes the most recent research on the economics of gender in

a range of areas  
Concludes each  
chapter with exercises  
and discussion  
questions

**The Oxford  
Handbook of Women  
and the Economy**

Routledge  
"A compilation of  
policy-relevant  
research by a  
multidisciplinary group  
of scholars on the state  
of families in rural  
America in the twenty-  
first century. Examines  
the impact of economic  
restructuring on rural  
Americans and  
provides policy  
recommendations for  
addressing the  
challenges they face"--  
Provided by publisher.  
Women Workers in the  
Industrial Revolution  
Penn State Press  
This book examines  
the writings of seven  
English women  
economists from the

period 1735–1811. It  
reveals that contrary to  
what standard  
accounts of the history  
of economic thought  
suggest, eighteenth-  
and early nineteenth-  
century women  
intellectuals were  
undertaking incisive  
and gender-sensitive  
analyses of the  
economy. Women's  
Economic Thought in  
the Romantic Age  
argues that established  
notions of what  
constitutes economic  
enquiry, topics, and  
genres of writing have  
for centuries  
marginalised the  
perspectives and  
experiences of women  
and obscured the  
knowledge they  
recorded in novels,  
memoirs, or  
pamphlets. This has  
led to an  
underrepresentation of  
women in the canon of

economic theory. Using insights from literary studies, cultural studies, gender studies, and feminist economics, the book develops a transdisciplinary methodology that redresses this imbalance and problematises the distinction between literary and economic texts. In its in-depth readings of selected writings by Sarah Chapone, Mary Wollstonecraft, Mary Hays, Mary Robinson, Priscilla Wakefield, Mary Ann Radcliffe, and Jane Austen, this book uncovers the originality and topicality of their insights on the economics of marriage, women and paid work, and moral economics. Combining historical analysis with

conceptual revision, *Women's Economic Thought in the Romantic Age* retrieves women's overlooked intellectual contributions and radically breaks down the barriers between literature and economics. It will be of interest to researchers and students from across the humanities and social sciences, in particular the history of economic thought, English literary and cultural studies, gender studies, economics, eighteenth-century and Romantic studies, social history, and the history of ideas.

**The House on Mango Street** Edward Elgar Publishing

Many of us absorbed the rules for being male or female from our families and the culture in which we

grew to adulthood. We formed beliefs about a man's role and a woman's role based on what we observed and experienced; mostly, those beliefs had to do with what men and woman did rather than who they were. Our ideas about what constitutes "masculine" and "feminine", by now outdated and inadequate, have led to a precarious imbalance both in our inner lives and in our external lives of relating to men and women. The result? A gender war. In *Joining Forces*, Jeanie Miley explains that our

deeply ingrained gender expectations have created an imbalance in our emotional and spiritual lives and have kept us from becoming our most authentic selves. *Joining Forces* will help readers discover the masculine and feminine characteristics that connect, unite, and restore us—traits that men and women alike can and do express. By joining our masculine and feminine strengths, we restore our own souls, our creative energies, and our own true, essential natures.
